

PEUGEOT

ALL-NEW 408

PLUG-IN HYBRID

SOPHISTICATED ALLURE

SOPHISTICATED ALLURE

A new concept in dynamic plug-in hybrid style, the PEUGEOT 408 boasts unexpected design with its unique feline posture, modern elegance and high-end quality.

Driven by innovation, the PEUGEOT 408 PHEV empowers the driver to choose between power sources to ensure you efficiently get to where you need to go. Drive in full electric mode for short urban journeys, or choose either hybrid or sport modes to power longer journeys.

This dynamic fastback seamlessly blends the sleekness of a sedan with the ruggedness of an SUV, providing a high driving position for maximum visibility and control.

The refined and sophisticated design, is reflected in the striking angular lines, sculpted bodylines and distinctive front and rear profile.

DESIGN & TECHNOLOGY

PEUGEOT i-Cockpit™

From the smart cockpit the driver remains in control and their focus can stay on the road thanks to the customisable, 10" head-up digital instrument display. This configurable digital instrument panel also presents essential driving information relevant for your journey, including details like Driving modes, Electric driving range level & Fuel range level.

CLEVER CONNECTIVITY

Connectivity is effortless with the intelligent PEUGEOT iConnect function, plus Bluetooth® mobile phone connectivity, wireless Apple CarPlay® & Android Auto™¹ and voice recognition to help you stay connected on the road.

ADVANCED INFOTAINMENT

Everything you need is at your fingertips via the intuitive, 10" High Definition touchscreen. The screen enables quick, accurate finger touch access to key functions including radio settings, seat functions and climate control, plus the built-in 3D Satellite Navigation.

1. Compatible Apple® or Android™ device required.

*Overseas model shown.

PLUG-IN HYBRID TECHNOLOGY

e-EFFICIENT AUTOMATIC

With the Electronic 8-speed Efficient Automatic Transmission (eEAT) fitted in the PEUGEOT 408 PHEV, the driver benefits from rapid and smooth gear shifts.

For a more hands-on approach, the driver can manually change gears using the paddles mounted on the steering column.

PLUG-IN HYBRID MOTOR

Enjoy the powerful, fluid and efficient drive delivered by the plug-in hybrid motor, or select all-electric mode for a near silent performance, with reduced vibrations and instant torque.

The 1.6-litre engine produces a combined 165kW for a rewarding and stimulating driving experience.

LITHIUM-ION BATTERY

Due to the positioning of the 300V high-voltage, Lithium-ion battery, no cabin or cargo space is sacrificed. With the battery located under the rear seats, there is generous rear cabin space and a large boot capacity.

The battery comes with an 8-year or 160,000 km warranty.¹

1. Whichever occurs sooner, from vehicle's warranty start date.

CHARGING YOUR PEUGEOT PLUG-IN HYBRID

Whether home charging or public charging, your PEUGEOT plug-in hybrid is designed to make life easy and to keep you mobile wherever you are.

PRIVATE CHARGING

A Wallbox is PEUGEOT'S recommendation for optimum charging at home.

This method will efficiently charge your vehicle in just a few hours.

PUBLIC CHARGING

Utilising the expanding network of public infrastructure is an easy way to top-up range on the go, with many easy to use apps available for you on your smart phone.

MYPEUGEOT APP

Use the MyPeugeot app to access your owner's handbook online, check servicing & maintenance schedules, as well as fuel tank levels and odometer readings.

It's also perfect for trip planning - sending that information to your car's built-in navigation - or checking where you parked.

DRIVING RANGE

Enjoy travelling both short and long distances in your PEUGEOT plug-in hybrid, including a WLTP test range of up to 60km¹ in 100% electric driving mode.

Tips to help optimise the driving range of your PEUGEOT:

THE POWER INDICATOR

Monitor energy consumption in real time, using the indicator on your dashboard, for efficient management of your vehicle's driving range.

REGENERATIVE BRAKING

When you release the accelerator the electric motor act as a generator, slowing the vehicle and recharging the battery.

1. Figure based on WLTP (Worldwide Harmonised Light Vehicle Test Procedure) static laboratory combined average city and highway cycle test, which measure, energy consumption, range and emissions in passenger vehicles, figures stated for the purposes of comparison amongst vehicles tested to the same technical procedures only. Actual real world range results will vary depending on a combination of factors including but not limited to load, driving style, type of journey, vehicle configuration, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions.

SPACE & CONVENIENCE

SPACE TO SPARE

Spacious interior dimensions allow passengers to stretch out in the cabin and enjoy generous legroom, while multiple convenient storage compartments allow all occupants to safely stow their personal items like phones and drink bottles for easy access.

BOOT SPACE

The PEUGEOT 408 PHEV boot features a generous cargo area of 471 litres.

Or you can more than triple the cargo capacity by folding down the split-fold rear seats to gain a massive 1545 litre capacity for all your gear.

HANDS-FREE BOOT OPEN

By using a small kick motion of your foot under the rear bumper, a sensor is activated to automatically open the boot.

You can then repeat the same action to activate the boot to close automatically, perfect for when your hands are full.

*Overseas model shown

SAFETY & ERGONOMICS

INTUITIVE SAFETY

From the elevated driver's position, to the latest generation driver assistance systems, a range of advanced features heighten on-board safety.

Cutting-edge safety features include lane positioning, long-range blind spot monitoring, Adaptive Cruise Control with lane following technology, advanced grip control and hill assist descent control.

CABIN COMFORT

Set the mood for a relaxing commute, or turn up the energy level, with customisable cabin lighting and a premium sound system to curate the soundtrack to your drive.

You can take stock of the invisible cabin environment too, with precise air quality control monitoring.

CONFIGURABLE i-TOGGLES

The new fully configurable PEUGEOT i-Toggles give you quick access to essential everyday functions.

Customise, set and store your own preferences for a shortcut to a range of applications and functions including the media display, climate temperature, navigation and phone settings.

Fuel tank capacity (L)	40

1. Tare Weight where quoted is for the vehicle unoccupied and unladen with full fluids and 10L fuel. Weights may change with the addition of equipment. An individual vehicle must be weighed to establish the exact kerb weight and payload applicable to that vehicle. It is the responsibility of the driver to ensure the vehicle is operated within the legal limits.
2. Fuel consumption results are based on WLTP or NEDC standard test procedure to provide customers with a basis for comparison of the performance of vehicles in accordance with ADR 81/02 only. No test can simulate all 'real world' driving conditions. Actual on-road fuel consumption is will vary due to factors such as traffic conditions, vehicle conditions and load, fuel quality and how the vehicle is driven.
